

DAVE MATTHEWS BAND

The Space Between – Released 13th August 2001

'UK Radio Edit'

35 million albums sales later, the Dave Matthews Band are back with their first UK friendly album, 'Everyday'.

This is the first single to be lifted from the new album and has all the potential of being a huge hit. The story in America is nothing less than incredible: Only four acts in the history of Rolling Stone Magazine have graced their front cover 5 times. Dave Matthews Band are in the esteemed company of The Rolling Stones, The Beatles and Madonna. The support act on the current US Tour was none other than Macy Gray. As for the 35 million album sales – this background begins to eclipse the story that recently accompanied Santana's 'Supernatural'!

One fan grew tired of making dupes of live Dave Matthews music that he invented a file sharing program on his computer. That fan was Shawn Fanning and he created Napster specifically to share the music of Dave Matthews Band, history in the making!!
