WATER IS OUR MOST PRECIOUS RESOURCE. This CD soundtrack was produced for an IMAX® Theatre 3D film, *Grand Canyon Adventure: River at Risk*. The documentary film tells the story of one threatened watershed, the Colorado River, on which 30 million people in America's Southwest rely. The film also points to a growing world water crisis. Waste, droughts, pollution and global warming jeopardize our water supplies. Some developing countries lack the funds needed to provide simple wells and sanitation for their citizens. In Africa alone, a million children die each year from water-related illnesses. As our population grows everywhere, our water resources are threatened by over-use. Together, with our partners' commitment, and with your involvement, we can conserve and protect our water sources, and because everyone deserves clean water, we must find ways to provide it. Please lend your voice and your hand, and learn about conserving water at home at www.GrandCanyonAdventureFilm.com

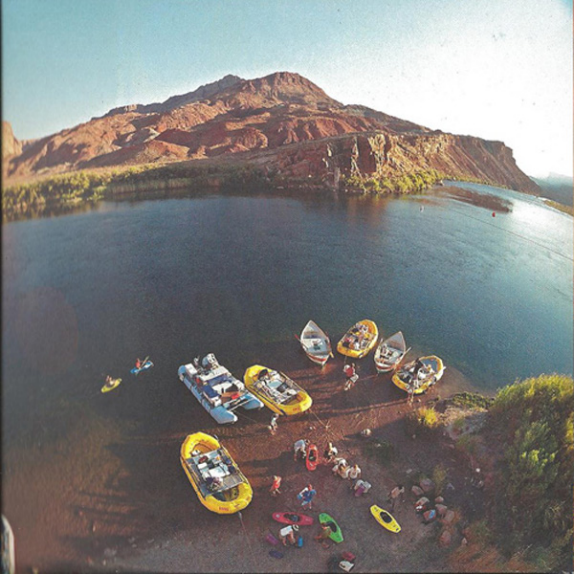

GRAND CANYON ADVENTURE: RIVER AT RISK 3D. The film is presented by TEVA and proudly supported by KOHLER in association with Reynders, McVeigh Capital Management and Museum Film Network. *Grand Canyon Adventure: River at Risk 3D* | Narrated by Robert Redford. Distributed by MacGillivray Freeman Films, Laguna Beach, California. | Companion Photo Book Available from Earth Aware Editions.

A COMMITMENT TO THE ENVIRONMENT AND TO WATER CONSERVATION forged the relationship between *Grand Canyon Adventure's* producer, MacGillivray Freeman Films, and Dave Matthews Band. Six original DMB master recordings were chosen to drive major scenes in the film. The stirring lyrics and melodies of Dave Matthews Band bring a soulful grandeur that suits the giant screen presentation and also reflects the vast and stunning beauty of the Grand Canyon. Steve Wood, who has worked on many IMAX® Theatre musical scores for director Greg MacGillivray, and DMB bass guitarist Stefan Lessard arranged and recorded variations of DMB songs and together created new compositions for the film. The resulting chemistry between film and musical score is best experienced in a giant screen theatre, but if not possible, we invite you to turn on your imagination and turn up the volume.
